

**North Shore Community College
Animal Science Department
Policy for Animal Use/Care on Campus for**

**Danvers Health Professions and Student Services Building [HPSS]
The Animal Science Department utilizes animals in both the Veterinary Technology and Animal Care Specialist Programs in order to provide necessary educational experiences for the students. In order to ensure that the animals are humanely treated and that students are safe, while experiencing an educational benefit from live animal use, the Animal Science Department has developed the following policies that all students and faculty must adhere to:**

- 1) Pre-approval by the instructor is required for any animals brought onto campus
- 2) Written proof of current Rabies Vaccination of the animal(s) MUST be provided to the instructor **before** the animal is brought onto campus.
